EMBOSS - DELIVERING PRE-ACCREDITED BUREAU SERVICES FOR ALL YOUR INTEGRATED EFT PAYMENT NEEDS

YESpay's EMBOSS bureau is the leading multi-acquirer pre-accredited Chip and PIN and magnetic credit & debit card payment service being used by independent and multi-chain retailers operating in high street, hospitality, leisure and mail order / telephone order environments. EMBOSS is the only viable alternative to standalone bank owned terminals that is capable of addressing all retailer integrated EPOS Chip and PIN needs enabling them to benefit from minimal capital investment, fast time to market and low monthly service costs.

Through the provision of fully hosted and managed EMBOSS payment services, Microsoft partners and customers can upgrade and deploy their accredited Chip and PIN enabled Retail Management Systems (RMS) within a matter of hours without further bank testing no matter what size EPOS estate they may have. Using a simple to integrate RMS add-on and an intuitive interface, retailers can confidently accept any card payment at their RMS point-of-sale with the knowledge that each transaction is securely authorised and settled with their card acquirer via EMBOSS.

Detailed transactions reports can be directly accessed in real-time using the web linking to EMBOSS making reconciliation simple. Downloadable transaction and settlement reports all the way to a single EPOS till can be accessed and imported into in-house accounts and management reporting applications in a matter of minutes.

YESpay's EMBOSS bureau service has gained multiple generic accreditations with a variety of PIN Pads and bank card acquirers. In addition, with the increased requirements of added transaction and card security, EMBOSS has also been fully certified to Payment Card Industry Data Security Standards (PCI DSS) mandated by Visa and MasterCard.

Verifone Secura

Verifone SC5000
